

# NEW PRODUCT

## C-LINE Linear Trunking System

C-LINE LED Linear Trunking System is an energy-efficient, low maintenance better alternative to traditional linear fluorescent in a variety of industrial, commercial and light assembly applications. It is the optimal solution for conventional lighting systems and also excellent for new installations due to its low installation cost and installation is tool-less. It saves both time and costs when installing lighting systems.

## C-LINE LINEAR TRUNKING SYSTEM

No P2000 trunking required | efficient lens control | 1 power feed per 120m | multiple phase adjustment | 120 lumen p/w | emergency & dali dimmable capability | mounting height 3m - 9m

Supermarket Application

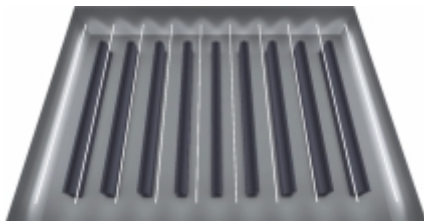

Warehouse Application

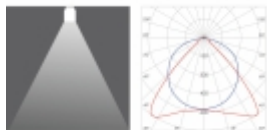

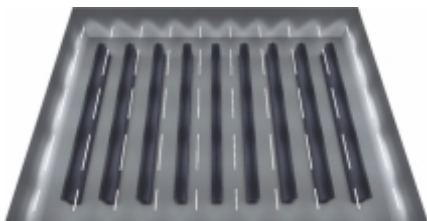

Industry Application

3-phase pre-selection via adjustable contact pin prior to installation. The trunking rail is standard with 5 or 7-core through-wiring with 2.5mm<sup>2</sup> cable cross-section. Power supplies, dimming & emergency supply easily integrated. Continuous electrical feed via trunking rail modules with pre-assembled connectors and integral plug-in system for electrical and mechanical connection. Flexible electrical feed-in and feed-out points.
